

Measurement by mouse click – with the measuring software FormControl the inspection of workpieces in the machining centre is as easy as that. Regardless of whether you are dealing with contours or workpieces with standard geometries, the operator will already recognise machining errors on the machine. This allows re-work in the initial setting. Manufacturing processes are simplified and quickened, transport and storage time between machine tool and measuring machine is omitted.

Contour Measurement

Workpiece Inspection

Diameter Measurement

Distance Measurement

Position Measurement

Angle Measurement

Roundness Measurement

Reference/Chain Dimensioning

Cylindricity Measurement

Concentricity Measurement

*Measuring & evaluation of standard geometries*

*Measuring of contours*

*Alignment function 2.0 and Best-fit*

*Compiling measurement reports*
